

HAMID AZEEM

FULL STACK WEB DEVELOPER & UI/UX DESIGNER

Pakistan | +92310-5242022 | hamidazeem01@gmail.com | linkedin.com/in/hamid-azeem-604658354

PROFESSIONAL SUMMARY

Skilled Full Stack Web Developer & UI/UX Designer specializing in NextJS, ReactJS, Tailwind CSS, and NodeJS to craft high-performance, visually engaging web applications. Expert in translating complex user flows into intuitive digital products, leveraging modern UI tools and AI-driven development environments. A collaborative leader with strong communication skills, focused on user-centric design and delivering seamless user experiences through clean, efficient code.

TECHNICAL & SOFT SKILLS

UI/UX Design:	Figma, Claude Design, Stitch, Galileo, Balsamiq, User Research, Wireframing, Prototyping, Design Systems
Full Stack Dev:	ReactJS, NextJS, NodeJS, ExpressJS, MERN Stack, Tailwind CSS, Material UI (MUI), JavaScript (ES6+), HTML5, CSS3, PHP, MySQL, PostgreSQL, RESTful APIs
AI Tools & IDEs:	Prompt Engineering, Cursor, Antigravity IDE
Tools & Platforms:	Git, GitHub, Upstash Redis, MongoDB, Google Sheets, MS Office
Soft Skills:	Leadership, Communication, Collaborative Teamwork, Agile Methodology, Problem-Solving

PROFESSIONAL EXPERIENCE

Benchmark Services — UI/UX Designer & Frontend Developer (Onsite)	Ended May 2026
- Transformed multi-tier client requirements into intuitive wireframes and interactive prototypes in Figma. - Engineered responsive, pixel-perfect user interfaces using ReactJS and Tailwind CSS across diverse devices. - Conducted usability testing and mapped user journeys to iteratively improve platform onboarding efficiency.	
Uptech Sol — Full Stack Web Developer (Hybrid)	March 2025
- Developed full-stack feature modules, optimizing relational database queries and backend RESTful API endpoints. - Enhanced layout responsiveness and visual hierarchies using modular ReactJS architectures and modern styling tools.	
Headstarter (New York based) — Full Stack Developer (Remote)	August 2024
- Collaborated within an agile global product team to build, test, and deploy features for high-traffic web apps. - Wrote clean frontend components and optimized asynchronous backend server response pipelines to remove lag.	

KEY PROJECTS

3D Full-Stack E-Commerce Platform	July 2026
- Developed an immersive full-stack e-commerce application integrating interactive 3D product previews for a dynamic shopping experience. - Natively embedded the Safepay payment gateway utilizing Safepay Atoms components to secure and streamline checkout flows.	
AI Social Media Post Generator & Scheduler	May 2026
- Designed a dashboard layout in Figma to simplify complex content creation workflows and scheduling displays. - Built a ReactJS frontend coupled with robust backend APIs for live post previews and automated publishing.	
Game Library App Design	2024
- Wireframed interactive, dark-themed user journeys in Figma optimized for tracking personal video game archives. - Created cohesive UI asset libraries, custom iconography sets, and responsive grid layouts for cross-device fidelity.	
MERN Stack E-Book Management System	2024
- Developed an end-to-end e-book content manager utilizing MongoDB, ExpressJS, ReactJS, and NodeJS frameworks. - Integrated custom JWT user authentication, dynamic catalog sorting UI, and seamless real-time inventory tracking.	

EDUCATION

Bachelors in Software Engineering (CGPA: 3.6/4)	Sept 2022 - June 2026 Pakistan
National University of Modern Languages (NUML)	

CERTIFICATIONS

Front-End Development Course — Udemy
MS Office Specialization (CCA) — TEVTA
